-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, claims 1-9 and 13-17 in the reply filed on 25 November 2005 is acknowledged.

Drawings

2. The drawings are objected to under 37 CFR 1.83(p)(3), which requires that all numbers, letters, and reference characters be at least 1/8 inch in height.

3. The drawings are objected to under 37 CFR 1.83(u)(2), which requires that "The view numbers must be larger than the numbers used for reference characters". In other words, "FIG. 1", "Fig. 2", ... should be made much larger.

4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner,

Art Unit: 1723

the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1, 4-9, 13-17 and 21-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schellenger (US 2,022,481) in view of Miller et al. (US 2,590,442). Schellenger ('481) discloses a paint circulation system comprising a supply channel (9); a return channel (18) and a plurality of drop lines (23,24) downstream of the supply channel and upstream of the return channel, each of the drop lines (23,24) having a paint output nozzle assembly including a paint spray gun (25,26) and control means (33,34,35,36). Coiled tubing is not disclosed. Miller ('442) discloses coiled tubing (18). It would have been obvious to one of ordinary skill in the art to have provided the drop lines of Schellenger ('481) with coils as taught by Miller ('442) to achieve the advantage of heating the paint, thereby lowering viscosity and saving time, reducing thinner consumption and improving quality (See col. 1 lines 1-22).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
